Abstrak

This research aims to analyze the influence of personality in speaking performance. The focus was an analysis of the influence of the extrovert and introvert personality of the student toward speaking performance. This research employed a descriptive qualitative research method with a case study approach. The result of this data described that there was no influence between extrovert and introvert personality toward speaking performance, but it is influenced by different levels of knowledge and frequent participation or well preparation. It showed that personality types are not a determiner factor for the success of Speaking Performance, it can be suggested that students with different personality types may employ different kinds of strategies for learning. Consequently, whether extrovert or introvert as long as the student had enough knowledge about the topic and also was supported by frequent participation or well preparation, the speaking performance would be better.

Keywords: Introvert, Extrovert, Personality, Speaking
