Dear author

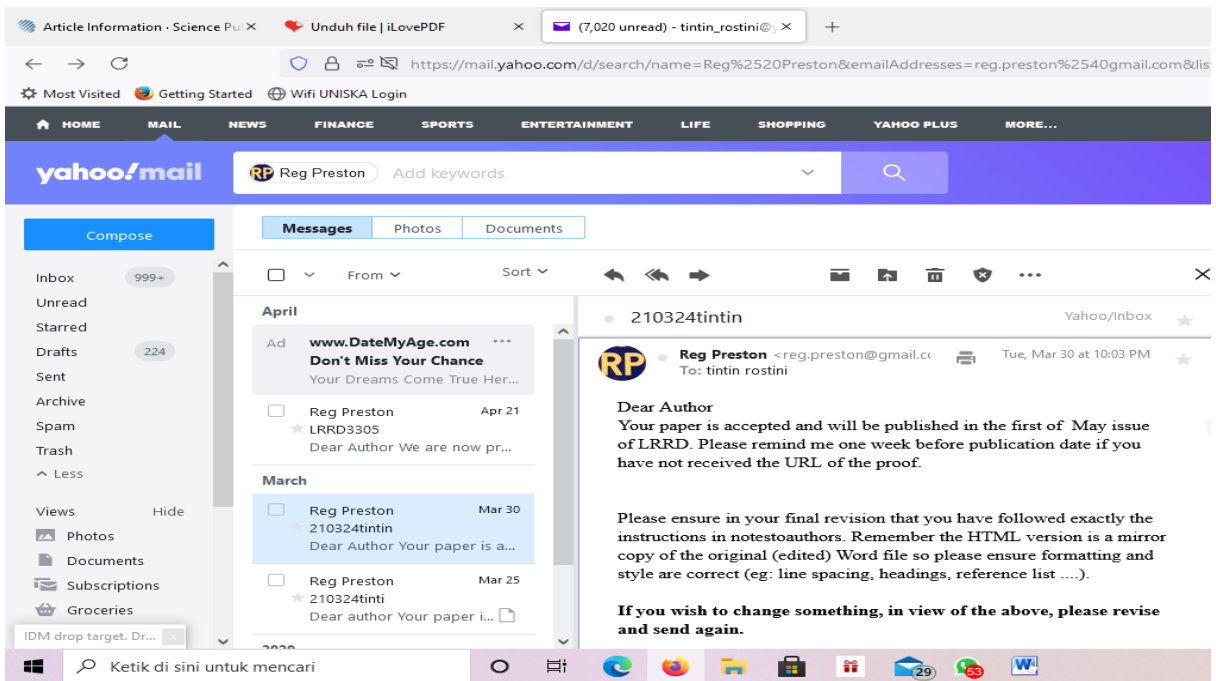

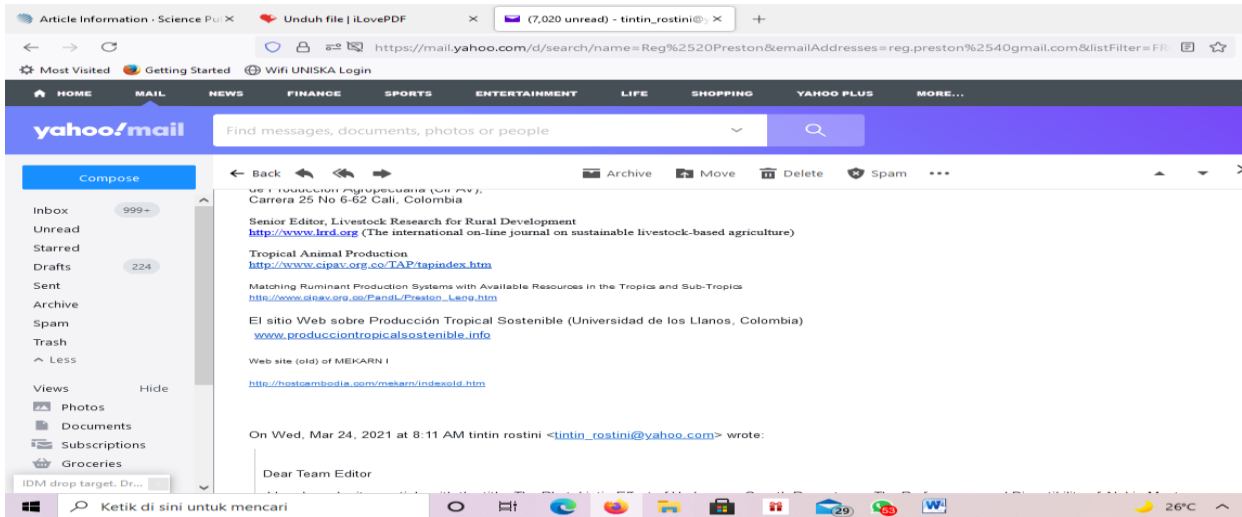

Your paper is accepted for publication en LRRD , but we suggest some slight modifications to improve the presentation. The tables should only have the mean values but with separate columns for standard error of the main and the exact probability you are equal numbers of birds treatment, therefore, you do not need the individual standard deviation for each treatment your design is a production function which means that you are studying the effect of an import on a range of outputs you need to show the nature of the response curve and in this way one can detect the optimum points for the inputs we have prepared for you the graphs for live weight gain and feed conversion you may wish to present one for feed intake. Please revise the reference list so that you follow the error on the system for this we attach a paper from one of your colleagues which shows exactly how the paper should be prepared yours

sincerely

style are correct (eg: line spacing, headings, reference list).

If you wish to change something, in view of the above, please revise and send again.

Please ensure your co-authors have all agreed to the final version. You will receive a link to a copy of the HTML version of the paper on the LRRD Proof Web site. This is to check that the proof reflects the final approved version. Only in special circumstances is it allowed to add or make changes to the proof.

Regards

Dear Author

We are now preparing your paper for posting on the LRRD website for May 2, 2021.

The following URL shows the contents of this issue:

The URL is

<http://www.lrrd.org/public-lrrd/proofs/lrrd3305/cont3305.html>

http://www.lrrd.org/public_html2/public-lrrd/proofs/lrrd3305

Choose your paper and copy it to a Word-Processing-Software to make any necessary corrections.

Check and confirm ASAP, especially references and citation.

Check the names of the authors in the main article, in the citation and on the contents page.

Authors who send corrections to tests should send an email to reg.preston@gmail.com in the following format: Identifying
